

# Unify Video

## Unlimited video meetings and team messaging

**Bring your distributed and virtual teams together with a modern, on-line meeting experience that includes everything needed to get work done. Create and maintain momentum before, during and after your meetings with messaging, file and screen-sharing, task management and share recordings with your colleagues and partners.**

**Unify Video uses industry standard encryption to ensure that all your meetings and collaborations are kept private and secure.**

**Easily share agendas and notes in a group conversation, schedule meetings with your favourite calendar applications or start a meeting with a single click.**

Unify Video delivers the following functionalities

- HD audio and video
- Unlimited 1:1 and group meetings with 24 hours duration
- Powerful browser-based video meetings—no downloads needed\*

- Microsoft Teams, Salesforce, and Slack
- Built-in team messaging with file sharing and task management

\*Available for Chrome and Microsoft Edge browsers (further browsers supported soon)

# Unify Video continued

## HD Video Conferences

Among the current landscape of communications providers, few have the rich history of Atos Unify and RingCentral in team messaging, video meetings, and telephony platforms.

This make us ideally suited to build the collaboration solutions that meet the demands of today's agile workforce - wherever they are, on any device.

### Easy to join meetings

Join from your desktop, browser, video, or mobile device — with no downloads or plug-ins required. You can also join from a variety of different applications, including Google and Microsoft Calendar. Simplifying the joining experience means more meetings start on-time.

### Easy to schedule meetings

With one click, the join information is automatically populated so it's easy to schedule even on the road—no downloads or plug-ins needed.

### Background noise reduction :

Automatically filter common sounds and shut them off. No more dogs barking, doorbells ringing, or loud keyboard typing!

### Exceptional mobile experience:

Join from any device. You can easily view and share content and participate in two-way HD video and the mobile scheduling experience is equally simple.

## Video Meetings Analytics Dashboards

Unify Video delivers some useful analytics dashboards of meeting usage across your organization, with the ability to drill down into user activity types or network conditions affecting the video meeting. Real-time and historical in-meeting activity data provide help desk personnel, IT staff, and leadership the service intelligence they need to measure ROI, identify and solve problems, and make informed decisions.

### Quality of Service

- Insights at-a-glance
- Critical meeting details
- Enables pro-active monitoring and fast troubleshooting

### Performance

- System performance
- Media usage visibility

### Adoption and Usage

- Messaging and calling usage
- By organisation, site and department

## System Requirements

- Broadband internet
- iOS 10.0 or later, Mac OS X 10.6 Snow Leopard or later, Android 5.0 or later, or Windows 7 or later
- Webcam (for video), microphone, and speaker
